

Aero Wireless Group Names Rebecca Hunter Vice President of Aero Smart Communities

BOULDER, January 5, 2020 – Aero Wireless Group, a leader in innovative wireless infrastructure solutions, names industry veteran Rebecca Hunter to Vice President of Aero Smart Communities.

Hunter will be responsible for expanding the company's national role as an infrastructure provider in smart city partnerships and working groups, comprised of wireless operators, technology providers and community leaders. She will be based out of the company's Washington, DC office.

"Rebecca shares our vision to build long term industry and community relationships as an integral partner in the development of sustainable infrastructure for smart communities", said Jim Lockwood, CEO of Aero Wireless Group. "Her experience uniquely positions her to lead Aero Smart Communities' strategy. She will be a great addition to our senior team."

Hunter joins Aero Wireless Group from Crown Castle, where she most recently served as Smart Cities and External Affairs lead for the company's Corporate Development and Strategy group. Throughout her 25-year career in telecommunications and technology, Hunter has held leadership positions for wireless carriers in their network deployments, government relations, public policy and business development.

"I'm thrilled to be joining Aero Wireless Group at such a pivotal time for the company and the industry," Hunter said. "We have an amazing opportunity to expand on the trusted relationships the group has in both the public and private sectors, as well as continue to build lasting strategic partnerships. I am excited to be part of its continued success and growth in enabling a connected world".

Hunter served on the board of the Telecom Industry Association (TIA) and the Intelligent Transportation Society of America (ITSA). She is an active member of the Smart Cities Council and the Wireless Industry Association (WIA). Hunter holds a Master of Business Administration from the Michael G. Foster School of Business at the University of Washington and a Bachelor of Arts in political science from the University of Florida.

About Aero Wireless Group

Aero Wireless Group is a leading innovator of smart infrastructure solutions and services for over 20 years. The group enables wireless operators, utilities and technology providers to expedite deployments in communities and major cities. Aero Smart Communities was established in 2016 to address the growing need to support municipalities and private communities. The company supports master development planning and responsible deployments of small cell and IoT technologies.
